## BUSINESS REVIEW

In 2020, the global economy was deeply dampened by the outbreak of the coronavirus disease (the “COVID-19”). Different levels of lockdown and quarantine measures have been taken due to the outbreak of the COVID-19 around the world, which have significantly reduced the human flows, social activities, transportation and trading activities worldwide and directly led to sharp fall in economies and increment of unemployment. This also severely and adversely affected the health-care products business line of the Group. In addition, the general slowdown in the growth of the global economy and international trade, and the gradual escalation of Sino-American trade friction have affected China’s economic growth. In light of that, during the year ended 31 December 2020 (the “Year”), the Group kept on further diversifying its existing product portfolio in different aspects in order to achieve a better and sustainable long-term development.

The Group continues maintaining its main business of sale of health-care products (the “Health-care Business”), while at the same time diversifying its businesses to expand the sale of electronic component products (the “Electronic Component Business”). The Group recorded an increase in the revenue by approximately 29.4% to approximately HK\$760.7 million for the Year, as compared to approximately HK\$587.8 million for the year ended 31 December 2019 (the “Prior Year”).

During the Year, the Health-care Business contributed the revenue of approximately HK\$443.8 million, while the Electronic Component Business contributed revenue of approximately HK\$316.9 million in the Year. Around 58.3% and 41.7% of the Group’s revenue was generated from the Health-care Business and the Electronic Component Business respectively in the Year.

The Electronic Component Business helped the Group mitigate the risk exposure under the uncertainty of the global economy.

## Management Discussion and Analysis

### *HEALTH-CARE BUSINESS*

During the Year, the revenue generated from sale of health-care products, which includes Chinese herbal medicine, skin-care and other health-care products, of approximately HK\$443.8 million, representing an increase of approximately 5.5%, as compared to that of the Prior Year. The increase was mainly due to the diversification of product portfolio. During the Year, segment profit of approximately HK\$28.2 million was generated from the Health-care Business, representing an increase of approximately 13.5%, as compared to that of the Prior Year.

### *ELECTRONIC COMPONENT BUSINESS*

The electronic component products that the Group sells are mainly central processing unit and semi-conductor. During the Year, the segment revenue and profit generated from the Electronic Component Business amounted to approximately HK\$316.9 million and HK\$17.0 million respectively, representing an increase of approximately 89.6% and 115.4% respectively. The Group diversifies its product mix into Electronic Component Business and enables the Group to broaden its income stream which will bring positive results to the Group.

### *GROSS PROFIT*

Gross profit increased by approximately 38.1% from approximately HK\$32.7 million in the Prior Year to approximately HK\$45.1 million in the Year. The gross profit margin gently increased from approximately 5.6% in the Prior Year to approximately 5.9% in the Year which maintaining at a relatively stable level between these two years.

### *OTHER INCOME*

The Group's other income mainly represented the Government grants from the Employment Support Scheme under the Anti-epidemic Fund. In the Prior Year, the Group's other income mainly represented the interest income from the money lending business of approximately HK\$16.9 million. The decrease was in line with the Group's strategy to reduce its money lending activities and allocate more fund for its core the business operations. Subsequent to the settlement of the outstanding balance of the loan receivables as at 31 December 2019, no new loans had been granted after the Year and up to the date of this report.

### *OTHER (LOSSES)/GAINS, NET*

The Group recorded other net losses of approximately HK\$18.2 million in the Year, while other net gains of approximately HK\$1.2 million for the Prior Year. The turnaround was mainly due to (i) provision for inventory of approximately HK\$3.5 million being recognised during the Year due to long inventory turnover period (2019: Nil); and (ii) provision of expected credit losses allowance on trade receivable of approximately HK\$14.0 million (2019: HK\$3.1 million) was recognised during the Year.

### *RESULTS*

Overall, the Group recorded a loss attributable to owners of the Company of approximately HK\$0.8 million during the Year, as compared to the profit attributable to owners of the Company of approximately HK\$26.7 million of the year ended 31 December 2019.

## Management Discussion and Analysis

### FUTURE PROSPECTS

The COVID-19 pandemic has not yet been under control and there are still uncertainties in the worldwide economy, the Group foresees that 2021 will continue to be a very challenging year.

With population growth, ageing trends and people's increasing awareness of health, the directors of the Company (the "**Directors**") believe that there will be a steady growth in the health-care products industry in the coming future. Meanwhile, the Group has been actively exploring opportunities to expand its product mix from time to time so to broaden the Group's income sources, which is expected to have a positive future impact on the Group's performance given the positive outlook of the health-care business.

The Group will continue to conduct its review on the business activities and assets of the Group for the purpose of formulating business plan and strategies for the future business development of the Group. The strategies of the Group are to achieve the best use of its resources, achieve portfolio diversification and improve its overall performance. The Group has been actively looking to diversify its revenue sources in order to bring valuable returns to the shareholders of the Company (the "**Shareholders**") through making investments and/or acquiring business or projects that have promising outlooks and prospects, and may also consider the possibility of disposing of business, investment or assets in respect of its non-core business currently held by the Group.

### WORKING CAPITAL AND INVENTORY MANAGEMENT

As at 31 December 2020, the non-current assets decreased by approximately 34.8% to approximately HK\$180.7 million, as compared with approximately HK\$277.2 million as at 31 December 2019. The decrease in non-current assets was mainly due to the disposal of investment property during the Year.

As at 31 December 2020, the Group recorded total current assets of approximately HK\$554.8 million (2019: approximately HK\$508.9 million) and total current liabilities of approximately HK\$61.6 million (2019: approximately HK\$122.8 million). The current ratio of the Group, calculated by dividing the total current assets by the total current liabilities, was approximately 9.0 times as at 31 December 2020 (2019: approximately 4.1 times).

The inventories increased by approximately 66.3% to approximately HK\$326.4 million as at 31 December 2020, as compared to that of approximately HK\$196.2 million as at 31 December 2019. Such increase was in line with the growing business during the Year.

The trade receivables, net of loss allowances decreased by approximately 23.9% to approximately HK\$193.4 million as at 31 December 2020, as compared with approximately HK\$254.0 million as at 31 December 2019. During the Year, a loss allowance for expected credit losses on trade receivables of approximately HK\$14.0 million (2019: approximately HK\$3.1 million) was recognised, which were estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date. The management of the Group regularly evaluates the Group's customers, assesses their known financial position and the credit risks.

## Management Discussion and Analysis

### LIQUIDITY AND FINANCIAL RESOURCES

As at 31 December 2020, cash and cash equivalents of the Group amounted to approximately HK\$16.4 million (2019: approximately HK\$20.0 million).

As at 31 December 2020, the Group's borrowings amounted to approximately HK\$22.7 million (2019: approximately HK\$74.6 million). The net debt to total asset ratio, calculated as borrowings less cash and cash equivalents divided by total assets, was approximately 0.01 (2019: 0.07).

### FOREIGN CURRENCY EXPOSURE

The Group faces foreign exchange risk as certain cash and cash equivalents are denominated in foreign currencies. The reporting currency is Hong Kong dollars ("**HKD**") and the purchases of health-care products and electronic component products are mainly made in United States dollars ("**USD**") and Canadian dollars ("**CAD**"). As a result, the Group incurred transactional and translational foreign currency gains or losses from its operations. For the Year, the Group incurred a gain of foreign exchange differences amounted to approximately HK\$0.7 million (2019: approximately HK\$0.4 million). The board of Directors (the "**Board**") will continuously monitor the foreign exchange exposure and will consider hedging of foreign currency risk should the need arise.

### CONTINGENT LIABILITIES AND CHARGE OF ASSETS

As at 31 December 2020, the Group continued to provide corporate guarantees on banking facilities granted to the Group's subsidiaries. The amount of bank borrowings utilised by the subsidiaries as at 31 December 2020 amounted to approximately HK\$22.7 million (2019: HK\$74.6 million).

As at 31 December 2020, certain land and buildings (2019: certain land and buildings and investment property) of the Group, with a total carrying value of approximately HK\$28.6 million (2019: HK\$124.5 million) were pledged to banks as securities for bank loans of approximately HK\$22.7 million (2019: HK\$74.6 million) granted to the Group.

### EMPLOYEES AND REMUNERATION POLICIES

As at 31 December 2020, we had a total of 22 employees. The Company determines employee salaries based on each employee's qualifications, position and seniority. Our Group has established an annual review system to assess the performance of our employees, which forms the basis of our decisions with respect to salary raises, bonuses and promotions.

The emoluments of the Directors are decided by the Board after recommendation from the remuneration committee of the Company, having considered the factors such as the Group's financial performance, the achievement of special targets and the individual performance of the Directors, etc..

Apart from mandatory provident fund and medical insurance, the Company has adopted a share option scheme under which share options may also be awarded to the Directors and eligible employees as an incentive with reference to the assessment of individual performance. The Board believes that the Group maintains an admirable relationship with the employees.

# Corporate Governance and Other Information

## COMPLIANCE WITH THE CORPORATE GOVERNANCE CODE

The Board is committed to achieving high standards of corporate governance to safeguard the interest of the Company's shareholders and to enhance corporate value and accountability. For the year ended 31 December 2020, the Company has applied the principles and complied with the applicable code provisions of the Corporate Governance Code (the "**CG Code**") as set out in Appendix 14 to the Rules Governing (the "**Listing Rules**") the Listing of Securities on the Stock Exchange, except in relation to CG Code provision A.2.1, as more particularly described below.

### *CG CODE PROVISION A.2.1*

CG Code provision A.2.1 states that the roles of chairman and chief executive officer should be separated and should not be performed by the same individual. Since 18 July 2019, the position of chief executive director has been vacant and the Company is still indentifying a suitable candidate for the position of the chief executive officer, and the Company has re-complied with the CG Code provision A.2.1.

The Group also has in place an internal control system to perform the check and balance function. There are also three independent non-executive Directors on the Board offering strong, independent and differing perspectives. The Board is therefore of the view that there are adequate balance-of-power and safeguards in place to enable the Company to make and implement decisions promptly and effectively.

## MODEL CODE FOR SECURITIES TRANSACTIONS

The Company has adopted the code of conduct rules (the "**Model Code**") regarding securities transactions by the Directors on terms no less exactly than the required standard set out in the Model Code for Securities Transactions by the Directors of Listed Issuers as set out in Appendix 10 to the Listing Rules, and that having made specific enquiry to all Directors, the Company confirms that all Directors have complied with the Model Code.

## Corporate Governance and Other Information

### THE BOARD OF DIRECTORS

The Board takes responsibility for overseeing all major matters of the Company, including the formulation and approval of all policy matters, overall strategies, internal control and risk management systems, monitoring senior management's performance and determining the policy for corporate governance.

#### *SALES OF GOODS ORDINANCE (CHAPTER 26 OF THE LAWS OF HONG KONG ("SOGO"))*

##### KEY SCOPE

SOGO regulates the sales of goods by the Group in Hong Kong. SOGO provides that, in a contract for the sale of goods by description, there is an implied condition that the goods shall correspond with the description. It also provides that where a seller sells goods in the course of a business, there is an implied condition that the goods supplied under the contract are of merchantable quality, except where an exception condition is met.

## Directors' Report

### COMPLIANCE MEASURES

The Group has adopted appropriate internal control, quality control measures and implemented standardised product return policies to ensure compliance with SOGO in relation to the supply of goods in Hong Kong.

During the Year, there has been no violation or breach of relevant laws and regulations that had a significant impact on the Group.

### RELATIONSHIPS WITH EMPLOYEES, CUSTOMERS AND SUPPLIERS

Remuneration packages are generally structured with reference to prevailing market terms and individual qualifications. Salaries and wages are normally reviewed on an annual basis based on performance appraisals and other relevant factors.

Apart from salary payments, there are other staff benefits including mandatory provident fund, medical insurance and performance related discretionary bonus. Share options may also be granted to eligible employees of the Group as incentives or rewards.

Relationship is the fundamental of business. The Group fully understands this principle and thus maintains close relationship with customers to fulfil their immediate and long-term needs. The Group also maintains good relationship with suppliers as they are essential to the Group's business performance and growth since they can have direct influence over the quality of products and customer satisfaction. We are committed to establishing a close and long-term cooperation relationship with business partners.

### PRINCIPAL RISKS AND UNCERTAINTIES OF THE GROUP

The Directors consider that the principal risks and uncertainties faced by the Group during the year ended 31 December 2020 included credit risk, currency risk and liquidity risk. For further details, please refer to note 3 to the consolidated financial statements.

#### How the matter was addressed in our audit

##### Impairment of trade receivables

Refer to Notes 3.1(c), 4(b) and 18 to the consolidated financial statements.

As at 31 December 2020, the Group had gross trade receivables of HK\$210,515,000 (2019: HK\$257,101,000) and provision for loss allowance of HK\$17,099,000 (2019: HK\$3,099,000).

Management performed the impairment assessment of trade receivables as at 31 December 2020 which requires significant estimation in determining the expected credit loss and this is based on information including but not limited to, credit loss experience, aging of trade receivables, past repayment history, subsequent settlement status and financial capability of the customers.

Management also considered forward-looking information that may impact the customers' ability to repay the outstanding balances in order to estimate the expected credit losses for the impairment assessment.

We focused on this area due to the magnitude of the trade receivable balances and the significant management judgements and estimates in determining the expected loss allowance of the trade receivables.

Our procedures in this area included:

- Understanding the status of each of the receivables that was past due through discussions with management and the sales team;
- Checking, on a sample basis, the accuracy of the trade receivables aging analysis used by management to estimate the appropriate provision for loss allowance;
- Checking, on a sample basis, the subsequent settlement of trade receivables by customers after the year end date;
- Evaluating management's impairment assessment and explanations on each of the significant trade receivables that were past due as at 31 December 2020 with reference to supporting evidence such as payment history of the customers, correspondences with customers and search of the customers' public profiles; and
- Assessing the appropriateness of the expected credit loss provisioning methodology, examining the key data inputs on a sample basis to assess their accuracy and completeness, and challenging the assumptions, including both historical and forward-looking information, used to determine the expected credit losses.

Based on the procedures performed, we found that management's judgements and estimates of impairment of trade receivables are supported by available evidence.

## Independent Auditor's Report

### The Key Audit Matter

### How the matter was addressed in our audit

#### Net realisable value of inventories

Refer to Notes 4(a) and 17 to the consolidated financial statements.

At 31 December 2020, the Group held inventories of HK\$326,381,000, net of inventory provision of HK\$3,500,000 (2019: HK\$196,241,000, net of inventory provision of HK\$Nil). Inventories are carried at the lower of cost and net realisable value ("**NRV**") in the consolidated financial statements.

Management estimated the NRV of inventories at 31 December 2020 based on the estimated selling price less cost to sell, which required significant judgements and assumptions to be made to determine the estimated selling price. The determination of estimated selling price of individual products is based on historical experience of sale of different products, expectation of future sales based on current market conditions and latest selling price subsequent to the year end date. The estimations may change as a result of future changes of market demand and management's sales and pricing strategy.

We focused on this area due to significant management estimates and judgements were involved in determining the NRV for inventories, which was material to the consolidated financial statements.

Our procedures in this area included:

- Understanding, evaluating and validating the key controls management adopted to determine the estimated selling price for different products;
- Evaluating the estimated selling price for different products based on discussion with management about the latest sales pattern and their sales and pricing strategy with reference to our knowledge on market demand and market trend of different products and comparing the estimated selling price with information of historical sales data and orders received subsequent to the year end; and
- Checking, on a sampling basis, the NRV calculation prepared by management based on the estimated selling price, the inventory aging report and the inventory quantity as at the year end.

Based on the procedures performed, we found management's judgements and assumptions made on the determination of NRV to be supported by the available evidence.

## Independent Auditor's Report

### OTHER INFORMATION

The directors of the Company ("**Directors**") are responsible for the other information. The other information comprises all the information included in the annual report other than the consolidated financial statements and our auditor's report thereon (the "**other information**").

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### RESPONSIBILITIES OF DIRECTORS AND THE AUDIT COMMITTEE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The Directors are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

## Independent Auditor's Report

### AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

## Independent Auditor's Report

### AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefit of such communication.

The engagement director on the audit resulting in this independent auditor's report is Tong Wai Hang.

## 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated. The consolidated financial statements are for the Group consisting of the Company and its subsidiaries.

### 2.1 BASIS OF PREPARATION

#### (A) COMPLIANCE WITH HKFRS AND HKCO

The consolidated financial statements of the Company have been prepared in accordance with Hong Kong Financial Reporting Standards (“**HKFRS**”) issued by the Hong Kong Institute of Certified Public Accountants (“**HKICPA**”) and the disclosure requirements of the Hong Kong Companies Ordinance Cap. 622 (“**HKCO**”).

#### (B) HISTORICAL COST CONVENTION

The consolidated financial statements have been prepared on a historical cost basis, except for the financial assets at fair value through profit or loss and investment property, which are measured at fair value.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.1 BASIS OF PREPARATION (CONTINUED)

##### (C) NEW AND AMENDED STANDARDS ADOPTED BY THE GROUP

The Group has applied the following standards, amendments to standards and annual improvements for the first time for their annual reporting period commencing 1 January 2020:

Amendments to HKFRS 3	Definition of a Business
Amendments to HKAS 1 and HKAS 8	Definition of Material
Amendments to HKFRS 9, HKAS 39 and HKFRS 7	Interest Rate Benchmark Reform

The amendments listed above did not have any significant impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

##### (D) NEW STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS NOT YET ADOPTED

A number of new standards and amendments to standards and interpretations that are relevant to the Group but not yet effective for the financial year beginning at 1 January 2020 and have not been early adopted by the Group are as follows:

<b>Standards</b>	<b>Key requirements</b>	<b>Effective for annual periods beginning on or after</b>
Amendments to HKFRS 16	COVID-19 Related Rent Concessions	1 June 2020
Amendments to HKFRS 3	Reference to the Conceptual Framework	1 January 2022

Amendments to HKAS 37	Onerous Contracts – Cost of Fulfilling a Contract	1 January 2022
Amendments to HKFRSs	Annual Improvements to HKFRSs 2018-2020 Cycle	1 January 2022
Amendments to HKAS 1	Classification of Liabilities as Current or Non-current	1 January 2023
Amendments to HKFRS 10 and HKAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	To be determined

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.1 BASIS OF PREPARATION (CONTINUED)

##### (D) NEW STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS NOT YET ADOPTED (CONTINUED)

The Group has already commenced an assessment of the impact of the new or revised standards that have been issued but either not yet effective for the financial period beginning 1 January 2020 or not been early adopted by the Group which are relevant to the Group's operation. The Group believes that the application of amendments to HKFRSs, amendments to HKASs and the new interpretations is unlikely to have a material impact on the Group's statement of financial position and performance as well as disclosure in the future.

#### 2.2 PRINCIPLES OF CONSOLIDATION AND EQUITY ACCOUNTING

##### (A) SUBSIDIARIES

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the statement of profit or loss, the statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of the Company.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.2 PRINCIPLES OF CONSOLIDATION AND EQUITY ACCOUNTING (CONTINUED)

##### (A) SUBSIDIARIES (CONTINUED)

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. It means the amounts previously recognised in other comprehensive income are reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs.

##### (B) JOINT VENTURE

Joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Investment in a joint venture is accounted for using the equity method of accounting (see (c) below), after initially being recognised at cost.

##### (C) EQUITY ACCOUNTING

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in the statement of profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from joint venture are recognised as a reduction in the carrying amount of the investment.

When the Group's share of net profit in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its joint venture are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in Note 2.8.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.2 PRINCIPLES OF CONSOLIDATION AND EQUITY ACCOUNTING (CONTINUED)

##### (C) EQUITY ACCOUNTING (CONTINUED)

When the Group ceases to equity account for an investment because of a loss of joint control, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in the statement of profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the statement of profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs.

If the ownership interest in a joint venture is reduced but joint control is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to the statement of profit or loss where appropriate.

#### 2.3 SEPARATE FINANCIAL STATEMENTS

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the financial statements of the investee's net assets including goodwill.

#### 2.4 SEGMENT REPORTING

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker.

The Company has appointed the executive directors as the chief operating decision makers to review the operating results of the Group on a consolidated basis, and makes strategic decisions.

#### 2.5 FOREIGN CURRENCY TRANSLATION

##### (A) FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars ("HK\$"), which is the functional currency of the Company and presentation currency of the Group.

##### (B) TRANSACTIONS AND BALANCES

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are generally recognised in the statement of profit or loss. All foreign exchange gains and losses are presented in the statement of profit or loss within "other gains or losses, net".

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined. Translation differences on assets and liabilities carried at fair values are reported as part of the fair value gain or loss. For example, translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in the statement of profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets, such as equities classified as fair value through other comprehensive income are recognised in other comprehensive income.

##### (C) GROUP COMPANIES

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- (ii) income and expenses for each statement of profit or loss and comprehensive income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- (iii) all resulting currency translation differences are recognised in other comprehensive income.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.5 FOREIGN CURRENCY TRANSLATION (CONTINUED)

##### (C) GROUP COMPANIES (CONTINUED)

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to the statement of profit or loss, as part of the gain or loss on sale.

##### (D) DISPOSAL OF FOREIGN OPERATION AND PARTIAL DISPOSAL

On the disposal of a foreign operation (that is, a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a disposal involving loss of joint control over a joint venture that includes a foreign operation), all of the currency translation differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In the case of a partial disposal that does not result in the Group losing control over a subsidiary that includes a foreign operation, the proportionate share of accumulated currency translation differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (that is, reductions in the Group's ownership interest in joint ventures that do not result in the Group losing joint control) the proportionate share of the accumulated exchange difference is reclassified to profit or loss.

#### 2.6 PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment, are stated at historical cost less depreciation less impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the statement of profit or loss during the reporting period in which they are incurred.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.6 PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

Depreciation is calculated using the straight-line method to allocate their costs, net of their residual values, over their estimated useful lives, as follows:

Leasehold land and buildings	2% or over the unexpired lease term, whichever is shorter
Properties leased for own use	The unexpired lease term
Leasehold improvements	20%
Motor vehicles	20%
Fixtures and office equipment	20%

Construction-in-progress represents buildings, plant and machinery under construction and pending installation and is stated at cost. Cost includes the costs of construction of buildings, the costs of plant and machinery, installation, testing and other direct costs. No depreciation is made on construction-in-progress until such time as the relevant assets are completed and ready for intended use. When the assets concerned are brought into use, the costs are transferred to property, plant and equipment and depreciated in accordance with the policy as above.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.8).

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount. These are included in the statement of profit or loss.

#### 2.7 INVESTMENT PROPERTY

Investment property, principally office buildings, is held for long-term rental yields and is not occupied by the Group. Investment property is initially measured at cost, including related transaction costs and where applicable borrowing costs. Subsequently, it is carried at fair value. Changes in fair values are presented in the statement of profit or loss as part of "other gains or losses, net".

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.8 IMPAIRMENT OF NON-FINANCIAL ASSETS

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

#### 2.9 INVESTMENTS AND OTHER FINANCIAL ASSETS

##### (A) CLASSIFICATION

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

See Note 3.4 for details of each type of financial assets.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.9 INVESTMENTS AND OTHER FINANCIAL ASSETS (CONTINUED)

##### (B) RECOGNITION AND DERECOGNITION

Regular way purchases and sale of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

##### (C) MEASUREMENT

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are recorded in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

##### DEBT INSTRUMENTS

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains or losses together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss. Interest income from these financial assets is included in finance income or other income using the effective interest method.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.9 INVESTMENTS AND OTHER FINANCIAL ASSETS (CONTINUED)

##### (C) MEASUREMENT (CONTINUED)

###### DEBT INSTRUMENTS (CONTINUED)

- Fair value through other comprehensive income (“**FVOCI**”): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets’ cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss and recognised in other gains or losses – net. Interest income from these financial assets is included in finance income or other income using the effective interest method. Foreign exchange gains and losses are presented in other gains or losses and impairment expenses are presented as separate line item in profit or loss.
- Fair value through profit or loss (“**FVPL**”): Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and presented net in profit or loss within other losses or gains, net in the period in which it arises.

###### EQUITY INSTRUMENTS

The Group subsequently measures all equity investments at fair value. Where the Group’s management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Group’s right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in other gains or losses, net in the profit or loss. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

##### (D) IMPAIRMENT

The Group recognises a loss allowance for expected credit losses (“**ECLs**”) on the financial assets measured at amortised cost (including loan to a joint venture, trade and other receivables, loan and interest receivables and cash and cash equivalents).

##### (D) IMPAIRMENT (CONTINUED)

###### MEASUREMENT OF ECLS

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The expected cash shortfalls are discounted using the following discount rate where the effect of discounting is material:

- fixed-rate financial assets and trade and other receivables: effective interest rate determined at initial recognition or an approximation thereof;
- variable-rate financial assets: current effective interest rate;

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

In measuring ECLs, the Group takes into account reasonable and supportable information that is available without undue cost or effort. This includes information about past events, current conditions and forecasts of future economic conditions.

ECLs are measured on either of the following bases:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date.

For all other financial instruments, the Group recognises a loss allowance equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

#### 2.9 INVESTMENTS AND OTHER FINANCIAL ASSETS (CONTINUED)

##### (D) IMPAIRMENT (CONTINUED)

###### SIGNIFICANT INCREASES IN CREDIT RISK

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Group compares the risk of default occurring on the financial instrument assessed at the reporting date with that assessed at the date of initial recognition. In making this reassessment, the Group considers that a default event occurs when (i) the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or (ii) the financial asset is 90 days past due. The Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- failure to make payments of principal or interest on their contractually due dates;
- an actual or expected significant deterioration in a financial instrument's external or internal credit rating (if available);
- an actual or expected significant deterioration in the operating results of the debtor; and
- existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

#### 2.9 INVESTMENTS AND OTHER FINANCIAL ASSETS (CONTINUED)

##### (D) IMPAIRMENT (CONTINUED)

###### BASIS OF CALCULATION OF INTEREST INCOME

Interest income recognised in accordance with Note 2.22 is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on the amortised cost (i.e. the gross carrying amount less loss allowance) of the financial asset.

At each reporting date, the Group assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; or
- the disappearance of an active market for a security because of financial difficulties of the issuer.

###### WRITE-OFF POLICY

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.10 OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The Group has also entered into arrangements that do not meet the criteria for offsetting but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy or the termination of a contract.

#### 2.11 INVENTORIES

Inventories are stated at the lower of cost and net realisable value. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

#### 2.12 TRADE AND OTHER RECEIVABLES

Trade receivables are amounts due from customers for goods sold in the ordinary course of business. If collection of trade and other receivables is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method. See Note 2.9 for further information about the Group's accounting for trade receivables and Note 2.9(d) and 3.1(c) for a description of the Group's impairment policies.

#### 2.13 CASH AND CASH EQUIVALENTS

For the purpose of presentation in the consolidated statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### 2.14 SHARE CAPITAL

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.15 TRADE AND OTHER PAYABLES, AND CONTRACT LIABILITIES

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

A contract liability is recognised when the customer pays consideration before the Group recognises the related revenue (Note 2.21). A contract liability would also be recognised if the Group has an unconditional right to receive consideration before the Group recognises the related revenue. In such cases, a corresponding receivable would also be recognised (Note 2.12).

#### 2.16 BORROWINGS

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the statement of profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the consolidated statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the statement of profit or loss as other income or finance costs.

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognised in the statement of profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.16 BORROWINGS (CONTINUED)

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

#### 2.17 CURRENT AND DEFERRED INCOME TAX

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

##### (A) CURRENT INCOME TAX

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

##### (B) DEFERRED INCOME TAX

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.17 CURRENT AND DEFERRED INCOME TAX (CONTINUED)

##### (B) DEFERRED INCOME TAX (CONTINUED)

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the Company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

#### 2.18 EMPLOYEE BENEFITS

##### (A) SHORT-TERM OBLIGATIONS

Liabilities for wages and salaries, including non-monetary benefits and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the consolidated statement of financial position.

##### (B) OTHER LONG-TERM EMPLOYEE BENEFIT OBLIGATIONS

The liabilities for annual leaves are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the end of the reporting period of high-quality corporate bonds with terms and currencies that match, as closely as possible, the estimated future cash outflows. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.18 EMPLOYEE BENEFITS (CONTINUED)

##### (B) OTHER LONG-TERM EMPLOYEE BENEFIT OBLIGATIONS (CONTINUED)

The obligations are presented as current liabilities in the consolidated statement of financial position if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

##### (C) POST-EMPLOYMENT OBLIGATIONS

The Group operates a mandatory provident fund scheme (“**MPF Scheme**”) in Hong Kong, the assets of which are held in separate trustee-administered funds.

##### DEFINED CONTRIBUTION PLAN

Defined contribution plan is a pension plan under which the Group pays fixed contributions, on a mandatory, contractual or voluntary basis, into a separate entity. The Group has no further payment obligations once the contributions have been paid. It has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

MPF Scheme in Hong Kong is a defined contribution plan for certain employees. The assets of the MPF Scheme are held in separate trustee-administered funds. Both the entity and the employees are required to contribute 5% of the employees’ relevant income up to a maximum of HK\$1,500 per employee per month. The entity’s contributions to the MPF Scheme are expensed as incurred.

##### (D) PROFIT-SHARING AND BONUS PLANS

The Group recognises a liability and an expense for bonuses and profit-sharing based on a formula that takes into consideration the profit attributable to the Company’s shareholders after certain adjustments. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

##### (E) TERMINATION BENEFITS

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of HKAS 37 and involves the payment of terminations benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.19 SHARE-BASED PAYMENT

Share-based compensation benefits are provided to directors, eligible employees, suppliers, consultants and customers under a share option scheme.

##### SHARE OPTIONS

The fair value of options granted under the share option scheme is recognised as expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted:

- (a) including any market performance conditions (e.g. the entity's share price);
- (b) excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining a grantee of the entity over a specified time period); and
- (c) including the impact of any non-vesting conditions (e.g. the requirement for grantees to save or hold shares for a specific period of time).

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in the statement of profit or loss, with a corresponding adjustment to equity.

#### 2.20 PROVISIONS

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.21 REVENUE RECOGNITION

The Group recognises revenue when a performance obligation is satisfied, i.e. when control over a product underlying the particular performance obligation is transferred to the customer, at the amount of promised consideration to which the Group is expected to be entitled.

#### SALE OF GOODS

Sale of goods is recognised when the Group has delivered goods to the customer, and the customer has accepted the goods and collectability of the related receivables is reasonably assured.

The Group sells a range of health-care products and electronic components in the market. Sale of goods are recognised when the Group has delivered products to the customers, the customers have full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customers' acceptance of the products. The Group normally does not accept any returns from customers. Delivery occurs when the products have been collected at the specified location and the control of promised goods have been transferred to the customers, given that the customers are satisfied with conditions of goods and has ability to direct the use of products.

#### 2.22 INTEREST INCOME

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

#### 2.23 GOVERNMENT GRANTS

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.24 LEASES

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group under residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

## Notes to the Consolidated Financial Statements

For the year ended 31 December 2020

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.24 LEASES (CONTINUED)

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received;
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group, which does not have recent third party financing; and
- makes adjustments specific to the lease, eg term, country, currency and security.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis (Note 2.6). If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

#### 2.25 RELATED PARTIES

- (a) A person, or a close member of that person's family, is related to the Group if that person:
- (i) has control or joint control over the Group;
  - (ii) has significant influence over the Group; or
  - (iii) is a member of the key management personnel of the Group or the Group's parent.
- (b) An entity is related to the group if any of the following conditions applies:
- (i) The entity and the Group are members of the same group (which means parent, subsidiary and fellow subsidiary is related to the others).
  - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
  - (iii) Both entities are joint ventures of the same third party.
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.
  - (vi) The entity is controlled or jointly controlled by a person identified in (a).
  - (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
  - (viii) The entity, or any member of a group of which it is a part, provides personnel services to the Group or to the Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

### 3 FINANCIAL RISK MANAGEMENT

#### 3.1 FINANCIAL RISK FACTORS

The Group's activities are exposed to a variety of financial risks: foreign exchange risk, interest rate risk, credit risk and liquidity risk. The management identifies, evaluates and mitigates financial risks in close co-operation with the Group's operating units. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

##### (A) FOREIGN EXCHANGE RISK

The Group primarily operates in Hong Kong. It is also exposed to foreign exchange risk primarily through sales and purchases which give rise to receivables, payables and cash balances that are denominated in foreign currencies other than the functional currency of the entities within the Group. The currencies giving rise to this risk are primarily CAD and USD.

Management manages its foreign exchange risks by performing regular review and monitoring its foreign exchange exposure.

As Hong Kong dollar is pegged to United States dollar, the Group considers the risk of movements in exchange rate between Hong Kong dollar and United States dollar to be insignificant.

As at 31 December 2020, if CAD had strengthened/weakened by 5% (2019: 5%) against HK\$, with all other variables held constant, post-tax loss (2019: profit) for the year would have been approximately HK\$67,000 higher/lower (2019: HK\$592,000 lower/higher) as a result of foreign exchange losses/gains (2019: losses/gains) on translation of CAD denominated assets and liabilities.

##### (B) INTEREST RATE RISK

Interest rate risk relates to the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's interest rate risk arises mainly from cash at banks and bank borrowings with floating rate, and loan to a joint venture and loan receivables with fixed rate. In view of the current market interest rate, the management considered that the effect of interest rate change on the balances with banks carrying interest at prevailing market rate does not have significant impact to the Group.

As at 31 December 2020, if interest rates on net exposures of variable-rate interest-bearing bank borrowings had been 30 basis points (2019: 30 basis points) higher/lower with all other variables held constant, post-tax loss (2019: profit) for the year of the Group would have been approximately HK\$57,000 higher/lower (2019: HK\$187,000 lower/higher) due to net interest expense paid on market interest rate.

As at 31 December 2020 and 2019, the Group's loan receivables were all issued at fixed rates which expose the Group to fair value interest rate risk. Management considers the fair value exposure of the fixed rate loan receivables is insignificant to the Group.

### 3 FINANCIAL RISK MANAGEMENT (CONTINUED)

#### 3.1 FINANCIAL RISK FACTORS (CONTINUED)

##### (C) CREDIT RISK

Credit risk is managed on a group basis. The Group's credit risk arises from trade and other receivables, loan and interest receivables and cash deposited at banks. The Group's maximum exposure to credit risk which will cause a financial loss to the Group in the event of the counterparties failure to perform their obligations as at the end of the reporting period in relation to each class of recognised financial assets is the carrying amount of these assets which are stated as follows:

	2020 HK\$'000	2019 HK\$'000
Trade and other receivables		
– Trade receivables	193,416	254,002
– Loan to a joint venture	35,610	33,600
– Other receivables	247	526
Loan and interest receivables	–	28,546
Cash deposited at banks	16,365	19,999
	<b>245,638</b>	<b>336,673</b>

##### TRADE RECEIVABLES

Sales to customers are required to be settled by partial prepayment in advance following a 30 to 90 days credit period. In order to minimise the credit risk, management is responsible for the determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue trade receivables. Normally, the Group does not hold any collateral over trade receivables. In addition, the management reviews the recoverable amount of each individual debt regularly. The Group considered the associated credit risk of trade receivables and debtors are manageable in general.

The Group has a concentration of credit risk from trade receivables from certain customers. For the year ended 31 December 2020, the top customer accounted for approximately 33% (2019: 32%) of the Group's revenue. As at 31 December 2020, all the Group's gross trade receivables were contributed from nine (2019: ten) customers in which the Group has a certain concentration risk as 19% (2019: 18%) and 61% (2019: 58%) of the trade debtors was due from the largest customer and the four largest customers respectively.

The Group applies the HKFRS 9 simplified approach to measure ECLs which uses a lifetime expected loss allowance for all trade receivables, which is calculated using a provision matrix.

##### TRADE RECEIVABLES (CONTINUED)

The Group categorises its trade receivables based on past due status, which is distinguished between the Group's different customer bases and separate the customer bases by operation segments, as well as the factors stated in Note 4(b) to measure the ECLs.

The following table provides information about the Group's exposure to credit risk and ECLs for trade receivables as at 31 December 2020 and 2019:

Opening loss allowance at 1 January	3,099	–
Loss allowance recognised during the year, net	14,000	3,099
Closing loss allowance at 31 December	17,099	3,099

##### LOAN AND INTEREST RECEIVABLES

The Group manages and analyses the credit risk for each of their new borrowers before making loans to them and offering the terms and conditions. The directors of the Company would evaluate the credit quality of the borrower by assessing the identity, background, financial position, listed equity investments held in a security service company, purpose of borrowings, etc. The Group may request for collateral after granting the loan, if necessary. Over the terms of the loans, management of the Group accounts for its credit risk by appropriately providing for expected credit losses on a timely basis by reference to each of the borrower's financial capabilities and their repayment history, and adjust with current and forward looking economic conditions. As at 31 December 2020, no outstanding loan and interest receivables were from the loans made to third parties (2019: two).

The following table provides information about the Group's exposure to credit risk and ECLs for loan and interest receivables as at 31 December 2019:

	HK\$'000
31 to 90 days past due	28,546

Included in the Group's loan and interest receivables balance as at 31 December 2019 was borrowings with aggregate carrying amount of HK\$28,546,000, which were past due at the reporting date, and regarded as occasional delay and did not constitute a significant increase in credit risk as the management has reviewed those borrowers with strong capacity to meet the contractual cash flow and satisfactory repayment history. All the loans and interest were settled during the year.

##### (C) CREDIT RISK (CONTINUED)

###### CASH DEPOSITED AT BANKS AND OTHER RECEIVABLES

As at 31 December 2020 and 2019, all cash and cash equivalents were deposited in state-owned banks and reputable financial institutions and were hence without significant credit risk. Management does not expect any losses by these counterparties.

For other receivables, management makes periodic collective assessments as well as individual assessment on the recoverability of other receivables based on historical settlement records and past experience. Those balances are assessed by the management of the Group as low risk of default with no any indicator to trigger a significant increase in credit risk nor deterioration of credit quality, since the relevant counterparties have strong capacity to meet the contractual cash flow.

##### (D) LIQUIDITY RISK

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities to meet the cash outflows of its financial liabilities.

The Group's primary cash requirements have been the payment for operating expenses. The Group mainly finances its working capital requirements mainly through internal resources. The Group's policy is to regularly monitor current and expected liquidity requirements to ensure it maintains sufficient cash and cash equivalents and working capital to meet its liquidity requirements in the short and long term.

#### 3.2 CAPITAL MANAGEMENT

The Group manages its capital to ensure that the Group's entities will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior years.

The capital structure of the Group consists of borrowings and lease liabilities, less cash and cash equivalents and equity attributable to owners of the Company, comprising share capital, other reserves and retained profits as disclosed in the consolidated statement of changes in equity.

Management reviews the capital structure regularly. The management considers the cost of capital and the risks associated with each class of capital, and will balance its overall capital structure through the payment of dividends, new share issues as well as the raising of bank loans.

The Group monitors capital on the basis of the gearing ratio as at 31 December 2020 and 2019. This ratio is calculated as net debts divided by total equity. Net debts is calculated as bank borrowings and lease liabilities, less cash and cash equivalents, as shown in the consolidated statement of financial position. Total equity represents the balance as "Total equity" shown in the consolidated statement of financial position.

	2020 HK\$'000	2019 HK\$'000

#### 3.3 FAIR VALUE ESTIMATION

##### NON-FINANCIAL ASSETS

##### (I) FAIR VALUE HIERARCHY

This note explains the judgements and estimates made in determining the fair values of the non-financial assets that are recognised and measured at fair value in the consolidated financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its non-financial assets into the three levels prescribed under the accounting standards. An explanation of each level follows underneath the table.

	Level 1	Level 2	Level 3	Total
	HK\$'000	HK\$'000	HK\$'000	HK\$'000
<b>At 31 December 2019</b>				
<b>Investment property</b>				
– residential property in Hong Kong ("Property I") (Note)	–	–	94,800	94,800

Note: During the year ended 31 December 2020, Property I was disposed and there was no other investment property held by the Group as at 31 December 2020.

Level 1	The fair value of all identical non-financial assets traded in active markets is based on quoted market prices at the end of the reporting period.
Level 2	The fair value of non-financial assets that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value of an asset are observable, the asset is included in level 2.
Level 3	If one or more of the significant inputs is not based on observable market data, the asset is included in level 3.

#### 3.3 FAIR VALUE ESTIMATION (CONTINUED)

##### NON-FINANCIAL ASSETS (CONTINUED)

##### (II) VALUATION TECHNIQUES USED TO DETERMINE LEVEL 3 FAIR VALUES AND VALUATION PROCESSES

The fair value of Property I was arrived at on the basis of valuation carried out by Jones Lang LaSalle Corporate Appraisal and Advisory Limited (“**JLL**”), an independent valuer which is not related to the Group. The Group’s finance department reviews the valuations performed by JLL for financial reporting purpose. These valuation results are then reported to the Group’s management for discussions and review in relation to the valuation processes and the reasonableness of valuation results.

The fair value of the investment property was arrived by using direct comparison method based on market observable transactions of similar properties in the similar conditions and locations of the subject property and adjusted to reflect the conditions of the subject property including property size and property floor level. In estimating the fair value of the property, the highest and best use of the property is it’s current use.

##### (III) FAIR VALUE MEASUREMENTS USING SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)

The following table presents the changes in level 3 items for the years ended 31 December 2020 and 2019 for recurring fair value measurements:

	<b>Property I</b> HK\$'000

### 4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of consolidated financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the Group's accounting policies.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances. The critical accounting judgements in applying the Group's accounting policies are described below.

#### *(A) NET REALISABLE VALUE OF INVENTORIES*

Determining whether a write-down is necessary in the carrying amount of inventories is based on a comparison of whether the historical value of the inventories is greater than their estimated selling price less all the related costs related to the selling process. In addition, a detailed physical examination and quality tests are also carried out in order to obtain an indication of realisable values. Once the carrying amount of the inventories is higher than their net realisable values, a write-down will be made so that the carrying amount of inventories would not be higher than their net realisable values. As at 31 December 2020, the carrying amount of inventories, net of write-down provision, was HK\$326,381,000 (2019: HK\$196,241,000).

#### *(B) IMPAIRMENT OF TRADE RECEIVABLES*

The Group considers the ECLs of trade receivables are based on management's estimate of the lifetime expected credit losses which is taking into account the credit loss experience, ageing of overdue trade receivables, customers' repayment history, collection status subsequent to year end, customers' financial position and an assessment of both the current and forecast general economic conditions, all of which involve a significant degree of management judgement.

The provision of ECLs is sensitive to changes in circumstances and of forecast general economic conditions. The information about the ECLs and the Group's trade receivables are disclosed in notes 3.1(c) and 18 respectively. If the financial condition of the customers or the forecast economic conditions were to deteriorate, actual loss allowance would be higher than estimated.

As at 31 December 2020, the carrying amount of trade receivables, net of loss allowance, was HK\$193,416,000 (2019: HK\$254,002,000).

### 5 REVENUE AND SEGMENT INFORMATION

#### (A) REVENUE

Revenue represents the sale value of health-care products and electronic components supplied to customers, which is recognised at point in time.

#### (B) SEGMENT INFORMATION

The Group determines its operating segments based on internal reports reviewed by the chief operating decision makers, which are the executive directors of the Company, for the purpose of allocating resources to the segments and to assess their performance which focus on the sale of different types of products from different business lines.

Specifically, the Group's reportable and operating segments have been identified as follows:

- (i) Health-care products: sale of health-care products (including Chinese herbal medicines, skin-care and other health-care products); and
- (ii) Electronic component products: sale of information technology components products (including central processing unit and semi-conductors).

### 11 INCOME TAX

#### (I) HONG KONG PROFITS TAX

Hong Kong Profits Tax is calculated at 16.5% (2019: 16.5%) on the estimated assessable profit. No provision for Hong Kong Profits Tax has been made for the Company and the subsidiaries incorporated in Hong Kong as they have no assessable profits or sufficient tax losses brought forward to set off against the estimated assessable profits for the current and prior year.

#### (II) PRC ENTERPRISE INCOME TAX

The subsidiaries established in the PRC are subject to PRC Enterprise Income Tax (“EIT”) rate of 25% (2019: 25%) during the year.

No provision for PRC EIT has been made as the subsidiaries established in the PRC have estimated tax losses for both current and prior year.

#### (III) INCOME TAX FROM OTHER TAX JURISDICTIONS

Pursuant to the income tax rules and regulations, the Group is not subject to income tax in the jurisdictions of the Cayman Islands and the BVI.

The taxation for the year is reconciled to (loss)/profit per the consolidated statement of profit or loss as follows:

	2020 HK\$'000	2019 HK\$'000
(Loss)/profit before income tax	(804)	26,715
Tax credit/(expense) at the applicable income tax rate of 16.5% (2019: 16.5%)	133	(4,408)
Tax effect of different income tax rates in other jurisdictions	315	178
Tax effect of expenses not deductible for tax purposes	(4,058)	(1,441)
Tax effect of income not taxable for tax purpose	493	476
Tax effect of temporary difference not recognised	(83)	118
Tax effect of tax loss not recognised	(2,761)	(144)
Tax effect of tax loss utilised	5,961	5,221
Income tax for the year	–	–

Note:

- (a) The Group did not recognise deferred income tax assets of approximately HK\$116,100,000 (2019: HK\$118,111,000) in respect of unutilised tax losses amounting to approximately HK\$695,376,000 (2019: HK\$715,827,000) that can be carried forward against future taxable income without expiry dates due to the unpredictability of future profit streams. Other temporary differences are not material.

For the year ended 31 December 2020

### 12 DIVIDEND

The board of directors of the Company does not recommend the payment of any dividend in respect of the years ended 31 December 2020 and 2019.

### 13 (LOSS)/EARNINGS PER SHARE

#### (A) BASIC

The calculation of basic (loss)/earnings per share is based on the (loss)/profit for the year attributable to owners of the Company and the weighted average number of ordinary shares in issue during the year.

	2020 HK\$'000	2019 HK\$'000
(Loss)/profit for the year attributable to owners of the Company	(804)	26,715
Weighted average number of ordinary shares for the purpose of basic loss/earnings per share (in thousands)	1,692,760	1,692,760

#### (B) DILUTED

Diluted (loss)/earnings per share is the same amount as the basic (loss)/earnings per share for the years ended 31 December 2020 and 2019 because the exercise of the outstanding share options would be anti-dilutive.

### 22 CONTRACT LIABILITIES

	2020 HK\$'000	2019 HK\$'000
Receipts in advance regarding:		
– Sale of electronic components products	–	31,246

Note:

- (a) Typical payment practice

When the Group receives a deposit from customers before supply and delivery of promised goods of electronic components products, which depends on the specific terms of sales and concern of new customer, this will give rise to contract liabilities at the start of contract. Payments are usually based on billing schedule.

- (b) Movements in contract liabilities

### 25 SHARE CAPITAL AND RESERVES (CONTINUED)

#### (B) NATURE AND PURPOSE OF RESERVES

##### (I) CAPITAL RESERVE

Capital reserve represents (i) an amount of HK\$5,002,000 arising from the difference between the nominal amount of the shares issued by the Company and the aggregate amount of the paid-in capital of subsidiaries acquired pursuant to the Group's restructuring in preparation for the listing of the Company's shares; (ii) deemed capital contribution from a shareholder amounting to HK\$3,551,000 and (iii) the difference between the amount by which the non-controlling interests are adjusted and the fair value paid to acquire additional equity interest in subsidiaries originally held by non-controlling shareholders.

##### (II) EXCHANGE RESERVE

The exchange reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations. The reserve is dealt with in accordance with the accounting policy set out in Note 2.5(c) and (d).

##### (III) SHARE OPTION RESERVE

The share option reserve represents the fair value of the actual or estimated number of unexercised share options granted to the eligible participants under the share option scheme of the Company recognised in accordance with the accounting policy set out in Note 2.19.

### 26 SHARE-BASED PAYMENT TRANSACTIONS

The Company's share option scheme (the "**Scheme**"), was adopted pursuant to a resolution passed on 9 June 2014 for the primary purpose of providing incentives to directors, eligible employees, suppliers, customers and consultants. Under the Scheme, the Board of Directors of the Company may grant options to eligible employees, including directors of the Company and its subsidiaries, to subscribe for shares in the Company. In addition, the Company may, from time to time, grant share options to third parties for settlement in respect of goods or services provided to the Group.

As at 31 December 2020, the number of shares in respect of which options had been granted and remained outstanding under the scheme was 71,080,000 (2019: 16,925,000), representing 4.2% (2019: 0.99%) of the shares of the Company in issue at that date. The total number of shares in respect of which options may be granted under the Scheme is not permitted to exceed 30% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders. The number of shares issued and to be issued in respect of which options granted and may be granted to any individual in any one year is not permitted to exceed 1% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders.

Options may be exercised at any time from the date of grant of the share option to the 10th anniversary of the date of grant. The exercise price is determined by the directors of the Company, and will not be less than the higher of (i) the closing price of the Company's shares on the date of grant, (ii) the average closing price of the shares for the five business days immediately preceding the date of grant; and (iii) the nominal value of the Company's share.

### 26 SHARE-BASED PAYMENT TRANSACTIONS (CONTINUED)

The fair values for the share options granted were calculated using the Binomial model. The inputs into the model were as follows:

Grant date	3 July 2020	12 June 2020	20 May 2019
Fair value per option on grant date	HK\$0.0671/ HK\$0.083	HK\$0.0646/ HK\$0.0816	HK\$0.0629
Share price on grant date	HK\$0.123	HK\$0.121	HK\$0.250
Exercise price	HK\$0.127	HK\$0.121	HK\$0.250
Expected volatility	136.554%	135.911%	67.681%
Expected life	5 years	5.0521 years	3 years
Risk-free rate	0.3420%	0.4103%	1.6780%
Expected dividend yield	0%	0%	1.2195%
Early exercise multiple			
– Directors	N/A	2.8X	N/A
– A supplier	N/A	N/A	1.35X
– A shareholder of one customer	2.2X	N/A	N/A

Expected volatility was determined by using the historical volatility of the Company's share prices over the previous year. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions and behavioural considerations.

The Binomial model has been used to estimate the fair value of the options. The variables and assumptions used in computing the fair value of the share options are based on the directors' best estimate. Changes in variables and assumptions may result in changes in the fair value of the options.

During the year ended 31 December 2020, the share-based payment expenses of approximately HK\$2,880,000 (2019: HK\$1,064,000) in relation to share options granted by the Company, of which amount of HK\$1,962,000 and HK\$918,000 was attributable to directors of the Company and a shareholder of one customer respectively, were recognised in profit or loss and included in "administrative expenses".

*Note:*

- Revenue for the years ended 31 December 2016 and 2017 represents the revenue, net of reversal/(provision) for rebates and discounts.
- As a result of the adoption of HKFRS 16, Leases, with effect from 1 January 2019, the Group changed its accounting policies in respect of the lessee accounting model. In accordance with the transitional provisions of the standard, the changes in accounting policies were adopted by way of opening balance adjustments to recognise right-of-use assets and lease liabilities as at 1 January 2019. After initial recognition of these assets and liabilities, the Group as a lessee is required to recognise interest expense accrued on the outstanding balance of the lease liability, and the depreciation of the right-of-use asset, instead of the previous policy of recognising rental expenses incurred under operating leases on a straight-line basis over the lease term. Figures in years earlier than 2019 are stated in accordance with the policies applicable in those years.
